Mrs. Truppi's Class Kindergarten

This month in kindergarten is going to be a very busy one. Science will introduce our Ocean unit where the students will learn about whales, dolphins, sharks, jellyfish, octopus, fish, seahorses, seashells, etc. While Social Studies will introduce these special holidays: Flag Day, Father's Day, and First Day of Summer! In Math, the students will learn greater than, less than, and also measurement. We will also continue to work on independent and guiding reading skills as well as new sight words. We are also very excited for our art show. This is going to be a month filled with lots of good emotions. Mrs. Noonan and I are so happy and lucky to have had every single one of our students this year. We are sad to see them go and wish we could keep them for another year, but we are also very proud of all their accomplishments and growth this school year. We are so excited for all of them on this next step into first grade and know they will do remarkably. Congratulations to the Jointure Kindergarten Class of 2023!
