Mrs. Truppi's Class Kindergarten

It's going to be a "hopping" good time in kindergarten! Science will introduce one of my favorite units: life cycles of plants and butterflies. While Social Studies will introduce these special holidays: April Fool's Day, Easter, Passover, Earth Day, and Arbor Day. In math, the students will continue to work on addition and subtraction and telling time. For Writing workshop and word study we will have the students continue with blends, writing complete sentences and learning more new sight words, lastly in reading the students will continue working on their independent reading and their last two reading strategies: Skippy Frog and Flippy Dolphin. This month is going to be messy and really fun!
